A POWERFUL GLOBAL EQUATION: BERKLEY LIFE SCIENCES + LLOYD'S SYNDICATE 1967 = ACCESS TO ADMITTED INTERNATIONAL CLINICAL TRIAL COVERAGE

Ewing, NJ, July 1, 2009 -- Berkley Life Sciences, LLC, a member company of W. R. Berkley Corporation, today announces an expansion of its international capabilities.

Through a strategic alliance with W. R. Berkley Syndicate Ltd., admitted clinical trials liability cover will be available to Berkley Life Sciences customers conducting clinical trials outside of the United States starting July 15th. Policies will be underwritten by Syndicate 1967 at Lloyd's, which has the ability to provide admitted cover in over 40 countries worldwide.

Unique features of the alliance include:

- **Technology Support:** A **web-enabled application** will help streamline the process of obtaining certificates of insurance where there are custom requirements. Certificates will typically be issued in **two business days or less**.
- **Country Specific Intelligence:** A country database will help customers understand the important issues they need to consider when conducting clinical trials outside of the United States.

In discussing the significance of the strategic alliance, Jill Wadlund, President of Berkley Life Sciences, noted: "This strategic alliance leverages the international reach and local knowledge of Lloyd's to overcome the challenges faced by companies seeking to conduct clinical trials in an effective and compliant manner." W. R. Berkley Syndicate Ltd. Chief Executive, Mike Sibthorpe, added: "We are delighted to collaborate with our colleagues at Berkley Life Sciences in this endeavor. We see great synergy between our two W. R. Berkley companies and look forward to providing seamless service to our mutual insureds."

Commenting on plans for continued expansion, Lisa Krist, Vice President and International Manager, stated: "While we are initiating this effort within the extensive Lloyd's platform, we intend to continue to expand our capabilities by aligning with other W. R. Berkley companies or entering into additional strategic alliances where necessary. This will ensure that our customers have access to admitted cover virtually everywhere they conduct clinical trials."
